Forum spam bot Does anyone know of a good forum spam bot? (kind of ironic how I ask on a forum where to get one, lol)

Re: Forum spam bot:

A good piece of spamming software wich came out is called "***XRumer***". . . it has been reaking havic on some of my white hat forums Big downside is the cost at \$450 plus \$10 a month!

botmaster. net Heres the features:

- *Automatically post your messages to forums, guestbooks, bulletin boards.*
- *Multi threaded submitting*
- *UNIQUE features:*
- *CAPTCHA recognition (in milliseconds),*
- *e-mail confirmation,*
- *built-in "question-answer" system,*
- *self-learning sytem,*
- *proxy refreshing*

and a lot of others.

The system is fully user-independent and requires minimum skills to handle: you only need to choose the proper links database, create a message text with one or several hyperlinks and hit the 'Start' button. THAT IS ALL.

XRumer software package includes the Hrefer program and databases with links to more than 102,000 forums. This extra-powerful software leaves any competitor in the dust trail.

XRumer will make a drastic increase in the number of unique visitors to your site, generating a never-ending flow of targeted traffic. The years of hard work the best programmers, SEO specialists and Internet marketing experts have put into this brilliant piece of software make XRumer the diamond among all SEO applications you've ever come across. Both novices and experienced 'gurus' will get amazed by the unbelievable features XRumer hides under the hood. The simple interface should not mislead you since from the very beginning all the efforts of the

programmers were put into the development of reliable, feature-rich software. XRumer fully automates the tasks all webmasters hate, and brings websites to high positions in Search Engines while simultaneously generating the flow of fresh and stable traffic. _____

Re: Forum spam bot:

wow, that's sweet. Too bad it costs so much, though I suppose it's worth it.

Re: Forum spam bot:

Did you actually use it Dave? I think \$450 is a lot of money, but that it can be earned back by spamming really fast. I have no experience myself in that field, but from all the stuff I hear it sounds pretty good

Re: Forum spam bot:

Quote: Originally Posted by xfiver Did you actually use it Dave? I think \$450 is a lot of money, but that it can be earned back by spamming really fast. I have no experience myself in that field, but from all the stuff I hear it sounds pretty good

Well it worked for me, 100k backlinks in about half an hour. Though obviously some get deleted etc so half it and say 50k. Not bad for half an hours work and \$450. Plus you get the uniques from people clicking on the links which you are spamming which for me was about 10k + for about a week.

Re: Forum spam bot:

it's definitely worth the \$450. . . i just need the money lol

The Following User Says Thank You to Professional For This Useful Post:
thraxed (12-27-2008)

Re: Forum spam bot:

I wish they didn't have the \$10 a month fee. But I guess that goes for product support and everything.

Re: Forum spam bot:

hmm can you use it on more than one computer?

I. e can I pay only \$450 and use it on both machines? Wonderings how much resources this program will use

Re: Forum spam bot:

I just emailed the owner of the for some more info _____

Re: Forum spam bot:

\$450 just to spam a site? pfft, i'd charge you \$29.99 an hour =P

Re: Forum spam bot:

Price going up soon. . . but yeah. . . it's worth it. If you want a sample of how well, hit me up with your message, email address to register you in the forums, and I'll make a run for ya. . . then, you can decide. I will only make a few thousand run, but that should be enough for you to decide to buy it, or subscribe to a monthly service to get your posts done.

Re: Forum spam bot:

Why not just get the source code and make your own?

Re: Forum spam bot:

ehh xrumer is very good soft, i mass change captcha on my forum, because they spam me i preffer blog or GB spamming, but forums are too good way to indexing by google

Re: Forum spam bot:

Hi ppl!xrumer seems to be a great program, but its extremly high priced. If anybody would be kind to share there licens with me that would be great, then i dont mean to send me the setup file, but to use it on my site. . I can pay you for doing this, i just need to see how good it works before i go ahead and spend 450USD on it. . . Also if there is any other softwares out there that work, it would be great if they could be listed here. Im new here, btw. . -morten

Re: Forum spam bot:

can someone provide me a download link here somewhere, with the crack of course. (i dont hope i get banned for asking this question, afterall this IS a blackhat forum)

Re: Forum spam bot:

or never mind, i will just google it myself

Re: Forum spam bot:

lol i tried looking for a crack for this and never found one. The \$450 price seems to pay for a

three month license, and each aditional month costs \$10 or \$100 for a year. so \$550 for a year its expensive but if you use it properly you could make that back quickly. I know that there are other forum spamming software but they seem to be about using old forums which are mostly abadoned, so generally your doing it for backlinks only.

Re: Forum spam bot:

Autoblog does the same thing except for blogs (gets you heaps of backlinks)www. trustedarticles. comPrice is \$4. 95 1 week trial but that only gives you 10,000 blogs to post to. Nice price, but when you get to the members area (after buying the demo) you find that the real cost is \$297) email me at sales@instant-leads. com and you can have the complete system (with URL grabbers and all) for say. . \$50or nearest offer)

Re: Forum spam bot:

goein to take a look at this.

Re: Forum spam bot:

Let me get a free demo, instantleads.

Re: Forum spam bot:

yea I will see how much it is worth after the free trial

Re: Forum spam bot:

It's quite expensive, but what a piece off software, try the demo :-)

Re: Forum spam bot:

Is there anyone who will jsut do a few thousand spams on one speicific forum for me please? I will give details and everything if you are willing to help. Thank you very much. PS: This is for personal use and I do not plan to use backlinks or any money making opportunity in this way. I only wish to use it for personal use.

Re: Forum spam bot:

you know its really odd when theirs no mention of a crack pretty much anywhere on the internet, or even a leaked demo anywhere to be found. I mean not even a demo for either of those software thats open to free testing.

Re: Forum spam bot:

I wont post the link here, but I have a complete working copy with crack for Xrumer. If anyone wants it PM me. Instant Leads

Re: Forum spam bot:

When you use this sort of software to promote your affiliate link, how do you keep from getting banned?(Always wondered how you could use this sort of program without that problem)

Re: Forum spam bot:

Man that's expensive

Re: Forum spam bot:

Flint, I own xrumer, and you do need to install a file on your server to check the proxys.

Re: Forum spam bot:

I'm interested in AutoBlog. Please pm me for a trade of value.

Re: Forum spam bot:

Thanks Starburst, was wondering why the instructions asked me download and set up a webserver on my PC and direct it to the botmaster website URL. I assume it asks you to do the same for the licensed version? To be honest I was more concerned about the trojans that come up when I virus scanned the files.

Re: Forum spam bot:

i think some people on here might be using that for their buddy promoter spam LOL

Re: Forum spam bot:

HI, i'm new here. Searching, i found another program for Forum Spam. The name is Forum Poster, the version 2. 0 is in the net, full version. The new version 2. 7 is more advanced (but i found just the trial) , it tell you if the forum have anti-bot. 2. 0 don't do that just say a kind of error. Well, that it's all. I prove it and for me it's very good program.

Re: Forum spam bot:

i have a crack. . . Last edited by Djingel; 08-06-2007 at 06:59 AM.

Re: Forum spam bot:

I have 2. 0 forum poster and it isn't anything special at all. How doesone get 2. 7? There site has old version. CG

Re: Forum spam bot:

Free demo for me pls! Let's get in touch.

Re: Forum spam bot:

pmmed you instant lead. hope for a reply. i'll try to find the software in a p2p biz community. hope to find it but i think its an exclusive share. .

Re: Forum spam bot:

can you people give the link of forum spam bot

Re: Forum spam bot:

is good spamming software

Re: Forum spam bot:

just downloaded demo from trustedarticles. comit seems to have fixed name, e-mail address and comment in one run, leaving way to many footprints to do some massive posting. (should be easy to put some randomization in name, e-mail and some random replacements in comment)apart from this, it just adds comments which are easy filtered by askimet.

Re: Forum spam bot:

sounds interesting but way to expensive for starters.

Re: Forum spam bot:

I have cracked one, and it crashed my computer everytime it's started, so. . . time to delete. Dark Lion, how about forum poster? Do you have any good results?

Re: Forum spam bot:

I would stay well clear of 'cracked' versions of X-Rumer. I paid a few dollars for a 'cracked' version 3. 0 from a guy on this forum just to see what it could do. The software was infected with 'Trojans' and the instructions suggested setting up a webserver on my PC before using it! I have found it interesting reading the forums on how webmasters are trying to defeat spam from X-Rumer. . . one method they are using is blocking all . ru email addresses. Worth a read before deciding whether it is worth spending your \$450.

Re: Forum spam bot:

i've got xrumer 2. 9 cracked but it is buggy and it requires complex installation process denwer ,xamp and all that. I heard forum poster was a crap or is 2,7 version any good ?Please guide.

Re: Forum spam bot:

hi. . . i'd like to ask :1. does xrumer 3. 0 runs in vista?2. is it safe?thanks guys. . .

Re: Forum spam bot:

How to install xrumer???
